**Gentest CLF**

Dear Mr. Boveroux,

we are pleased to provide you with the result of the genetic testing with respect to CLF. We analyzed the sample with a proprietary marker test and identified the following genotype:

Lab-ID	Horse	ID	Genotype	Status
FM2176	Holiday Petit Coeur	24AA313	T/T	Free of the CLF-allele with 98% probability

The diagnostic test was carefully conducted using state-of-the-art methodology. Nevertheless, errors cannot be excluded with 100% probability, as there is for example always a very small possibility of novel unknown DNA mutations. We therefore cannot give a warranty on the accuracy of the results. Any liability for subsequent damages in the course of an incorrect test result is excluded.

Yours sincerely,

Prof. Dr. Tosso Leeb
